1. Plant No. 3 in Gorzow⁸ of the State Engineering Works (Panstwowe Zaklady Inzynierii-P.Z.I.) is the correct name of the factory which has been known as the Ursus Plant. The factory which is properly known as the Ursus plant of the P.Z.I. is Plant No. 1, the main factory of the Works, which is located in Ursus near Warsaw. Plant No. 3 employs about 200 workers and manufactures the heads and pistons for the Lanz-Bulldog tractors produced by the Ursus plant. The factory manufactured 8 to 10 h.p. single-cylinder Diesel engines used for agricultural purposes under the German occupation, but in 1945 the Russians removed all the machine tools and left only the foundry intact.
2. Plant No. 2 of the P.Z.I. is located in Szczecin (Stettin) and employs about 600 workers. This factory manufactures parts for the Lanz-Bulldog tractor and for tractors supplied by UNRRA to Poland. Under the German occupation the plant produced smoke shell mortars and small vehicles, some with caterpillar tracks. About 60 percent of the factory was destroyed during the war and in 1945 the Russians removed all the equipment and raw materials from the plant.

Comment: This may refer to Chorzow.
